

# OnTRACK™

for college readiness

## Overview

OnTRACK lessons, funded by the Texas Education Agency, align with the Texas Essential Knowledge and Skills in ELAR, mathematics, science, and social studies. Each lesson includes engaging content, interactive experiences, assessment and feedback, and links to additional resources.

Available in TEA's Project Share, OnTRACK lessons supplement classroom instruction and intervention with dynamic learning experiences that use video, graphics, and online activities.

OnTRACK lessons are intended to supplement classroom instruction and intervention. While these lessons are organized into Project Share "courses," they do not cover every student expectation in the TEKS for the corresponding SBOE-approved course. Students cannot earn course credit by completing OnTRACK lessons.

Self-paced, credit-bearing courses using OnTRACK materials are available in Algebra I, Algebra II, and geometry through the Texas Virtual School Network.

## ONTRACK LESSONS

### Mathematics

Algebra I	60 Lessons
Algebra II	75 Lessons
Geometry	55 Lessons

### Science

Biology	52 Lessons
Chemistry	57 Lessons
Physics	51 Lessons

### \*Social Studies

World Geography	48 Lessons
World History	46 Lessons
US History	45 Lessons

### \*English

English III	73 Lessons
-------------	------------

*\*ELAR and Social Studies lessons will be available in Project Share soon!*

## How might a teacher use OnTRACK lessons?

1. *OnTRACK content helps students visualize the concepts they are learning. Teachers can use all or part of a lesson with a class or group of students.*
2. *OnTRACK supports individualized intervention for students. Teachers may assign topics, lessons, or activities for a student to work through independent of the teacher during or outside class hours.*
3. *OnTRACK content engages students. A teacher might open or close a lesson with a Kid2Kid video, interactive, or timeline.*
